Sinatra

README DOCUMENTATION BLOG CONTRIBUTE CREW⬈ CODE⬈ ABOUT Gittip

NOTE: Feel free to fork <u>Sinatra's website on GitHub</u> and add your own entry to the `wild.markdown` file. Just push and send a pull request. We'll take care of the rest.

Applications

- <u>Flip Text</u> A simple app used to flip text upside down.
- <u>SequenceServer</u> An easy-to-setup BLAST sequence search server
- <u>Flickr Group Viewer</u> is a (nicer?) way to view photos in a flickr group – <u>on GitHub</u>.
- <u>OnBoard</u> a web interface to manage Linux-based network appliances.
- <u>Tweetrad.io</u> text to speech conversion for twitter
- <u>Tweeps</u> conference app to aggregate tweets by attendees
- <u>Integrity</u> the easy and fun Continuous Integration server
- <u>Sum</u> is an email-based budgeting application
- <u>Marley</u> the blog engine without <textareas>
- <u>Postview</u> a simple blog-engine that render text files written in <u>Markdown</u>.
- <u>Scanty</u> an even more minimalist blogging engine
- <u>Scanty using CouchDB</u>
- <u>Scanty using CouchDB 0.9.0a and CouchRest 0.16</u>
- <u>Haze</u> a lightweight and minimalist blogging engine using flat text files.
- <u>Wind</u> HTML5 blog engine focused in a easy, extensible and fast admin.
- <u>git-wiki</u> a git-powered wiki
- <u>Wordnatra</u> an interface to Princeton's WordNet lexical dictionary
- <u>GitHub-FogBuz</u> logs your GitHub commits with FogBuz
- <u>Notable</u> listens on Jabber to take your notes and then displays them back to you
- <u>Dash Sinatra</u> provides a Ruby API to push metrics from an app to the <u>FiveRuns Dash service</u>
- <u>Giftsmas</u> Gift Tracking Website using Sinatra, Sequel, and Scaffolding Extensions
- <u>Toopaste</u> Pastebin site created with Sinatra and DataMapper
- <u>Columnlog</u> Tiny feed fetching app
- <u>Kapow</u> Comics on your iPhone
- <u>Knapsack</u> Pack pages into data URIs
- <u>Thumblmonks</u> Delayed HTTP Requests
- <u>weaky</u> a basic CouchDB wiki
- <u>Amnesia</u> an app that presents memcached server stats
- <u>So Nice</u> is a Small web interface to control iTunes, Rhythmbox or MPD
- <u>sinatra-rubygems</u> A complete reimplementation of the gem server command as a Sinatra application
- <u>Nesta</u> is an SEO oriented CMS/blog for developers
- <u>Hancock</u> A Single Sign On provider based on OpenID

- Hancock Client Rack middleware client for the Hancock server, written in Sinatra
- Rails Searchable API Doc runs on Sinatra
- Sinatra Saucer JRuby web application frontend for Flying Saucer, which converts XHTML into a PDF
- WineAdds micro-app that calculates common additions to wine
- Deltacloud Deltacloud protects your apps from cloud API changes and incompatibilies. REST API is written using Sinatra
- Jaconda A simple team collaboration service that allows you to create chat rooms for groups through Gtalk/Jabber protocol. REST API is written in Sinatra
- Soxer Soxer is a lean but infinitely extensible web publishing tool.
- SinMagick a front-end for image processing and thumbnailing with flexible storage options.
- Fundry – Crowdfunding for Software Development – Fundry is designed around software projects, helping developers get paid for developing new features, and enabling your community to pledge to get the features they want. The site and API (coming soon) is all written in Sinatra.
- Picky – a fast & clever semantic search engine.
- Headhunter – giving Twitter profile pics a permanent URL
- blitz.io – Making load and performance testing a fun sport
- GitHub High Scores – A fun way to rank GitHub repository contributors in a 8-bit, 80's-tastic aracdey viewing environment.
- Git-Webby – Git Smart HTTP Ruby/Sinatra implementation with useful features.
- Trudy – A Nabaztag server.
- Markdown Tree – Serve a Hierarchy of Markdown files simply (like mksite or other site generators, only dynamic)
- Fracture.it URL shortening service [Source]
- streetart.io streetart.io allows you to share and discover interesting street art, public art and sculptures around you and your city. API is powered by Sinatra and Redis.
- TaskwarriorWeb – A Sinatra-based web interface for the Taskwarrior todo application. Because being a neck-beard is only fun sometimes.
- Travis CI – Free Hosted Continuous Integration Platform for the Open Source Community

Libraries and extensions

- Sinatra::SimpleNavigation Easy creation of navigations (with multiple levels) with sinatra and the simple-navigation gem
- sinatra_more Library with agnostic generators, form builders, named route mappings, easy mailer support, and more.
- Sinatra's Hat Mount models as web services in Sinatra with ease
- Classy Resources Think resources controller, except for sinatra
- Sinatra Ditties A collection of plugins and useful helpers
- Chicago runtime and testing helpers, extensions, and macros commonly used by Thumblemonks
- Capinatra Quickly deploy Sinatra apps to Passenger.
- Frankie Easy creation of Facebook applications with Sinatra and the Facebook gem
- Sinatra Application Template Base app with DataMapper, Haml and RSpec. Fork and build.
- Sinatra OAuth Provider an OAuth provider implemented with Sinatra
- Spork Executes some aynchronous code using Sinatra running under Passenger
- Retweet Create Twitter apps like tweetdreams.org with ease

- <u>Rack Flash</u> Simple flash hash implementation for Rack with extra sugar for Sinatra.
- <u>Sinatra-REST</u> generates RESTful routes for your models (ActiveRecord, DataMapper, Stone)
- <u>R18n</u> Agnostic i18n library with Sinatra extension.
- <u>url_for</u> Construct absolute paths and full URLs for current application.
- <u>WebIRC</u> Web-based IRC client.
- <u>content_for</u> Rails-like `content_for` helper for your views (supports ERB and Haml.)
- <u>Sinatra Effigy</u> Sinatra extension for Effigy (HTML in .html files, Ruby in .rb files) views.
- <u>Sinatra Mongoid</u> Sinatra extension for Mongoid (MongoDB ORM).
- <u>Haml::More</u> Adds more functionality to Haml and Sass
- <u>Sinatra::AdvancedRoutes</u> Makes routes first class objects
- <u>Sinatra::Compass</u> Integrates the Compass stylesheet framework
- <u>Sinatra::ConfigFile</u> Adds YAML config file support
- <u>Sinatra::MoreServer</u> Adds support for more web servers to Sinatra::Base#run!
- <u>Sinatra::Namespace</u> Adds namespaces, allows namespaces to have local helpers.
- <u>Sinatra::Reloader</u> Advanced and fast code reloader
- <u>Sinatra::Sugar</u> Extensions for Sinatra's standard methods, like #set or #register
- <u>Sinatra::TestHelper</u> Adds helper methods and better integration for various testing frameworks
- <u>Sinatra::WebInspector</u> Allows you to inspect a running app
- <u>Yard::Sinatra</u> Displays Sinatra routes (including comments) in YARD output
- <u>BigBand</u> Pre-configured replacement for Sinatra::Base setting up useful extensions
- <u>Sinatra::Jsonp</u> JSONP output helper for Sinatra.
- <u>Bowtie</u> Admin generator for DataMapper models, on Sinatra.
- <u>Sinatra::Kittens</u> Random kitten pictures for Sinatra not_found pages.
- <u>Sinatra::FuzzyLayout</u> Extension for enabling or disabling layout template for views using regex.

Websites

- <u>LinkedIn</u> is a social network for business contacts
- <u>I Shoot Film</u> presents Funkaoshi's film photography posted to Flickr organized by film rolls – <u>on GitHub</u>.
- <u>Speed of Animals</u>: imagine being a spotted hyena…
- <u>Bloor and Lansdowne is Blansdowne</u> is a photoblog about a neighbourhood in Toronto.
- <u>NYLS Upload Tool</u> Web-based replacement of FTP
- <u>Fabulously40 Mobile</u> Sinatra powered mobile site of <u>Fabulously40</u>
- <u>UploadBooth</u> Sinatra powered Upload Service
- <u>PasteBooth</u> Sinatra powered multi-lingual Paste Service
- <u>ShrinkBooth</u> Sinatra powered multi-lingual URL shortening Service
- <u>Calendar About Nothing</u> Seinfeld calendar for hackers
- <u>irclogger</u> Logging urz IRC channel <u>#sinatra</u>
- <u>URL Unwind</u> Don't get RickRolled again
- <u>Tweetdreams</u> Twitter dream journal
- <u>Does Follow</u> Twitter tool for figuring out who follows whom
- <u>portfolio.quirkey.com</u>
- <u>Gusg.us</u> Blog – Ridding the long bus
- <u>Deleanotes</u>
- <u>themoviedb.org</u> The name says it all :)
- <u>columnlog</u> Tiny feed fetching app
- <u>Your Fiveruns Dashboard</u>

- **IronRuby** Watch their great stats here
- **MooURL** The web's cutest URL shortening service
- **FlexCode** iPhone development
- **California PATH program – UC Berkley** In-vehicle applications on their Vehicle-Infrastructure Integration server
- **TweepDiff** Compare friends/followers of two Twitter users
- **Effectif Development**
- **Chirp-chirp** Write a Sinatra-based Twitter clone in 200 lines of Ruby code
- **Rdoc.info** Auto-generate and host Ruby library documentation using GitHub web hooks
- **All Sorts** An aggregator for novel *collective nouns*, driven by Twitter
- **Congrelate** Congress data mashup visualization tool.
- **Scholas** Social file-sharing for academics.
- **Gemcutter** Awesome gem hosting.
- **SavvyFranchises** Franchise Search + Discovery for the Savvy Entrepreneur.
- **The Setup** The setup is a bunch of nerdy interviews (Source)
- **A Good Company** An awesome little portfolio for a great design company.
- **dbpedia lite** takes some of the structured data in Wikipedia and presents it as Linked Data (Source).
- **Evan Lecklider** Website showing off work, code examples and experiments built with Sinatra and Compass.
- **Brightspoke.com** matches people with bicycles.
- **Kittygram** shows cute cat photos from around the world.
- **happens.co.za** Add countdown times for any "happening" or event and share it with others.
- **DarkArts Studios** Projects and source code of Clive Crous
- **Ant genome database**
- **GitHub High Scores** A fun way to rank GitHub repository contributors in a 8-bit, 80's-tastic aracdey viewing environment.
- **Conker Software** Micro-company of Tom Philip that makes Web, Android and Boxee apps.
- **Similander** extracts keywords from a given URL to find similar pages (Source).
- **Sombras de Papel** Website of a pop-rock band from Barcelona (Spain) entirely made using Sinatra + HTML5. There's also an automatic mobile site.
- **streetart.io** streetart.io allows you to share and discover interesting street art, public art and sculptures around you and your city. The website is a sinatra app which pulls data via the API.
- **Scrum Primer** – A short introduction to Scrum. The code is at Scrum Primer @ Github. Also uses r18n for Sinatra
- **Jembatan Keledai** A collection of mnemonics in Indonesian.

Companies using Sinatra

- **Heroku**
- **GitHub**
- **Apple**
- **BBC**
- **LinkedIn**
- **Agency Rainford**
- **Songbird**
- **Curbed Network**
- **Meticulo**
